**AGENDA ITEM # 4**

**AGENDA ITEM EXECUTIVE SUMMARY  
Committee of the Whole Meeting  
March 11, 2019**

**Item Title:** Annual Landscaping Maintenance Contract Extension

**Staff Contact:** Karen R. Young, P.E. Public Works Director

**COMMITTEE OF THE WHOLE ACTION**

**Consider a staff recommendation to extend an annual landscaping maintenance contract and to include in that contract additional landscaping maintenance services previously completed by Village staff.**

**Executive Summary:**

**Existing Landscape Maintenance Contract Services**

The Village has been utilizing the services of Uno Mas Landscaping Company for the annual landscaping maintenance contract since 2016. The annual landscape management program addresses numerous properties throughout the Village including: Civic Center complex, commuter parking lots, historical museum property, Public Works facilities, and stormwater detention areas located in various parks in the Village.

As Staff evaluated the needs for the 2019 season, we discussed the quality and value of the services provided by Uno Mas. Uno Mas has performed the services exceptionally well and have continued to hold their unit prices from the 2016 bid. In early 2019, Uno Mas provided a letter to the Village stating they would again hold their unit prices to perform the work in 2019 with the option in 2020 and 2021 to extend the contract at the same unit prices. This would be a zero cost increase to the Village since the original contract in 2016 and additional work added in 2017.

Below is the history of the current contract with Uno Mas Landscape Company:

- **April 5, 2016** – Staff solicited and received competitive bids for landscape management services.
- **April 11, 2016** – Village Board approved a contract with Uno Mas Landscaping Company for the 2016 season for \$85,368.
- **March 27, 2017** – Village Board approved one-year extension of the 2016 contract for the 2017 season for \$85,368.
- **April 24, 2017** – Village Board approved an amendment to the contract to add the landscape maintenance services for the Botterman and Devlin Wastewater Treatment Facilities for \$16,000.

- **April 9, 2018** – Village Board approved a one-year extension of the 2016 contract (\$85,368) and the 2017 additional services for the Botterman and Devlin Wastewater Treatment Facilities (\$16,000) for the 2018 season for \$101,368. Locations included in Exhibit A.

### **Evaluation of Public Works Staff Mowing versus Outsourcing Landscape Maintenance Services**

There are several locations in town that are currently mowed by both Public Works seasonal and full-time employees. As part of the 2019 proposed budget process, an evaluation was completed to analyze cost, workload, and level of service for the areas that are currently being mowed by Public Works staff versus having a contractor mow these locations in the future.

The attached supplemental document provides a detailed summary of the evaluation.

- **Current Contractual Mowing Locations (Exhibit A)**
  - Completed by Uno Mas at a total cost of \$101,368.00.
- **Current Public Works Employee Mowing Locations (Exhibit B)**
  - Proposed cost for Uno Mas to complete mowing \$22,300.
- **Comparison of Contractor vs Public Works Employee Mowing (Exhibit C)**
  - A comparison of the cost and man-hours for the work being completed by Public Works staff versus a contractor.

### **Other Items for Consideration**

#### **Seasonal Workers**

- **Assumptions** - The table above assumes the best case scenario of Seasonal Workers being available for the full 12 weeks and with no scheduled vacations. There are times where we have experienced a shorter working timeline for summer seasonal workers, which would significantly increase the costs for this work to be completed by full-time staff.

#### **Full-Time Employees**

- **Priorities** – Mowing is not the number one priority for Public Works. There are many planned operations during the summer months that often have to be adjusted to take care of emergencies and customer service needs in the community.
- **Monthly Mowing Cost** - The monthly billing rate for Public Works full-time staff completing this work is \$1,432.80 more per month than a contractor completing the work.
- **Fleet Maintenance** – In addition to staff time for mowing, additional hours are expended by fleet staff for the maintenance of mowing equipment, which is not accounted for in these costs.

#### **Contractor Completing the Work**

- **Consistency** – A contractor is dedicated to doing one thing. In times when Village staff has to adjust priorities a contractor is dedicated to completing this task.

- **Enhancement to Village Staff** – This is a great way to supplement village resources at a reasonable cost.

### **Focus Areas for Additional Public Works Staff Hours**

Using a contractor to complete the mowing as identified in Exhibit B will free up 800 hours of staff time that will be allocated to other priorities. Seasonal Workers would be able to complete less technical public works tasks, which will free up our full-time staff to complete other projects that require more skilled labor. For example:

### **Seasonal Worker Tasks**

- More aggressive watering of Village plantings and restorations.
- Assistance with Special events that happen throughout the year.
- Special projects like power washing Village properties.
- Assisting with vacation coverage of full timers.
- Handling the multitude of block party setups and takedowns throughout the summer.
- Assist with restorations from storm sewer repairs, main breaks etc.
- Litter patrol in the many areas where debris gathers.
- GIS data gathering.
- General cleanup of vehicles and facilities.
- Village Gateway sign beautification.
- Miscellaneous rough cut mowing of areas not included in the expanded mowing contract, i.e. stormwater structures and wetlands.

### **Full-Time Tasks**

- Regulatory sign replacement.
- Storm sewer repairs.
- Pavement patches.
- Large restoration projects.
- Tree trimming work.
- Complex special event preparation.
- Street light maintenance and replacement.
- Storm sewer cleaning and inspecting in accordance to the NPDES permit requirements.

### **Equipment Sale**

If the mowing areas identified in Exhibit A & B were to be outsourced on a permanent basis the Village could sell one light duty trailer along with one zero turn mower. The remaining equipment would be utilized for maintaining storm structures and handling an unforeseen mowing related assignment.

### **Implications:**

**Is this item budgeted?** Yes. There are adequate reserve funds in the FY2019 Budget in the General Fund, Parking Lot Operating Fund, and the Water and Sewer Operating Fund to pay for these additional outsources services.

**Any other implications to be considered?** None.

### **Attachments:**

Staff's Contract Mowing Analysis Memo

## CONTRACT MOWING OF VARIOUS LOCATIONS

The Village is responsible for mowing several areas throughout the community from spring thru fall. Generally the locations include various Village owned properties, parkways, detention ponds, parks, and wetlands. This work is currently completed by contractors and Public Works staff (Full-time and seasonal workers). As part of the budget process an evaluation was completed to gain an understanding of the impacts as it relates to cost, workload and level of service for contractual mowing versus Public Works staff mowing, which is summarized.

### **Mowing Season:**

- **Finish Mowing Locations:** Typically runs April thru November, budgeted for 8 months.
- **Rough Mowing Locations:** Typically runs from mid-May thru mid-September estimated 5 month duration. Weather has an impact on this, but 5 months is the budgeted average.

### **Mowing Locations & Responsibilities:**

The attached supplemental documents detail the locations the Village is responsible for mowing and who is currently mowing each location.

- **Current Contractor Mowing Locations (Exhibit A)** – Many of these locations are considered the finish mowing locations that require a more manicured lawn and include other services such as spring and fall clean-up, weed control, trimming bushes, cultivating mulch, irrigation needs and annual plantings.
- **Current Public Works Staff Mowing Locations (Exhibit B)** – The remaining mowing locations are completed by Public Works Staff. These locations are considered more rough mowing locations that typically don't require a manicured lawn or the other services as listed above.

### **Public Works Staff Mowing:**

Staff completing this work is comprised of both seasonal workers and full-time staff. The seasonal workers are primarily responsible for the mowing during the summer months, but due to their school schedules they are only available to work for 8-12 weeks of the 5 month mowing season. During the gap in time where the seasonal employees are not available to work full-time employees are completing

## **CONTRACT MOWING OF VARIOUS LOCATIONS**

the mowing. The total time generally allocated to the mowing completed by staff is 2 employees for 2.5 days per week, which equals 40 hours per week total.

### **Contracted Mowing versus Public Works Staff Mowing Evaluation:**

Exhibit C provides a summary of the total cost and hours for Public Works staff to complete the mowing for the locations as identified in Exhibit B and the cost for a contractor to complete the same work.

The total cost for Public Works staff to complete this work is \$17,545.60 and contractor is \$22,300.00. There is a budgeted cost increase of \$4,754 annually by having this work completed by a contractor. With that being said, 40 hours per week for twenty weeks (800 hours annually) is being dedicated by full-time and seasonal employees to mowing each year. By moving to contractual mowing Public Works staff can focus on other important Village initiatives and increase productivity during the summer months on items such as pavement patching, sidewalk repairs, storm sewer work, tree trimming, etc.

**Equipment Sale:** With the proposed change to contracted mowing we anticipate a reduction of lawn equipment. The sale of this equipment along with the reduced annual maintenance costs will provide for additional savings. If the mowing areas identified in Exhibit A & B were to be contracted out on a permanent basis the Village could sell one light duty trailer along with one zero turn mower. The remaining equipment would be utilized for maintaining storm structures and handling a unforeseen mowing related assignment.

**Updates:** The information in this packet has been updated since the 2018 budget submittals to provide additional details.

**EXHIBIT A****MOWING LOCATIONS CURRENTLY COMPLETED BY CONTRACTOR****(NOTE: THESE ARE FINISH MOWING LOCATIONS WHICH ALSO INCLUDE SPRING & FALL CLEAN-UP, WEED CONTROL, TRIMMING BUSHES, CULTIVATING MULCH & IRRIGATION IN THE TOTAL COST)**
